SALUTATION

Blessings and tranquility to you. The situation at Tumaini is excellent. I give thanks to God for his love-showing toward us.

INTRODUCTION

Various activities that took place in June 2023 will be covered in this report. Read about the following subtopics: Transfiguration tales, Education, Holy Sustenance, Midterm break, Charity work, Trip, Health, Prayer Items, and Appreciation**.**

TRANSFIGURATION STORIES

Hannah Wanja is currently 7 years old and is in Kindergarten at Tumaini Primary. She joined

Tumaini this year after her case was discovered with those of her siblings as follows; She was born in an outskirt of a town called Naivasha where the father was very drunkard and could sell everything in the house leaving hannah and her siblings with nothing on the table. The mother could go round seeking food only for men to take advantage of her. Hannah's mother decided to get out of the marriage since it had become toxic and was housed by a church, after a while she deadly fall ill and was taken to the hospital only to be discovered she had contracted HIV/AIDS. The grandmother of Hannah who is so aged took back Hannah's mother and her children to her place which is near Tumaini children's home. While at her grandma's place Hannah and her siblings relied on relief food from the community and well-wishers. GOA compassion department team learnt about this case and didn't hesitate to rescue hannah and her siblings.

We learnt that Hannah had attained the school going age and she never had the chance to go to school. She has successfully begun her education and she hopes to become a Nurse. She loves playing games and watching while in her leisure time.

PETER KARIUKI

Peter had been living with the father for the longest time possible. By the time he understood himself, he did not find the father living with the mother. He inquired and he was told they separated when he was 6 months old after a disagreement and she left with her two sisters who were older than him.

The father remarried and life was not easy for Peter. Whenever the father was not around, the step mother would assault him physically, deny him food and make him do all the house chores while her children were sited watching him and verbally

abusing him. He couldn't dare tell the father after he was given a warning that he would be killed. This drained him so much and opted to run away from home to search for food in the nearby shopping Centre. The father later found out what his child was undergoing and he decided to end his marriage.

Although the father has been providing the basics, he completely failed to enroll him back in school after the covid 19 pandemic period after schools were closed for many months. Peter claims there were two gentlemen who would warn him not to go to school and if they saw him they would beat him.

He reported the case to his father who took the matter to the sub chief's office and no action was taken to the culprits. After the situation continued, the father decided he should drop out of school in order for his child to be safe. This was against the child's rights to education.

Both the father and the child were taken to custody for defying the right. They stayed in custody for 5 days, taken to law courts and the presiding judge ordered that the child be placed in Tumaini children's home by the help of the sub county children's officer in order for him to access and gain education. The father will remain in custody for further investigations.

When he joined Tumaini, he was always rude to everyone, getting involved in fights as a way of defending himself and when he joined school he did not perform well. Through showing him love and discouraging the vices, he has turned out to be one of the most obedient boys in the institution, he has improved academically and performing so well.

Being deprived living with the closest person he has known all his life earlier along affected him, through counselling he has accepted the outcome and that one day he will be re-united with his father and this time he will not drop out of school.

He loves playing football and when he grows up he wants to be an army officer.

HOLY SUSTAINMENT

We are steadfastly committed to sustaining the Christian ethics and values that are expected of both children and adults in Tumaini because those standards were built on the foundational principles of our institution.

Children at home and school have continually vowed to serve God every day through morning fellowship, Sunday services, weekly Christian union services, and evening prayers. The workers and children must are continually obedient to God and accountable.

CHILDREN'S WELL-BEING

I am grateful to God for being present with us both this month and forever. The majority of our children were able to fight off the cold that was brought on by the recent, heavy rains we've been

experiencing because they have robust immune systems. These few occurrences from this month are listed here.

For illnesses like tonsillitis, sore throats, and dry, lingering coughs, our kids were seen in a hospital when the case was severe.

MERCY WAMAITHA

A 14 year girl who was admitted in Tumaini in the year 2022 was infected by chicken pox. Went for medication and right now she improving. We secluded her from other children to control the spread of the virus.

MUTHONI HANNAH

Has a big wound on her upper thigh. The wound is open and has been there for quite some time. Took her to the hospital and was seen by a dermatologist who gave her an ointment and a follow up clinic after a month whereby she will get a dosage through injecting the wound.

MARCUS MACHARIA

After an X-ray was carried out, it showed that the type of cancer is locked and has not spread on other areas of his leg other than the previous. The oncologist advised for follow-ups clinics after six months and was given a go ahead to involve in sports and only in volleyball.

ANN WAITHERA

Her knee would swell now and then. We decided she should visit the hospital for treatment, an X-ray was done which showed she did not have any problem. The doctors advised that a creep bandage should be used to hold her knee. She is now fine and participated in the ongoing games.

EDUCATION

Majority of the kids reported making gains in their academic performance during term two of 2023's first half. They have made a significant good shift in their mindset, which I found to be quite encouraging, and I hope they will keep

doing so. The midterm was on June 23, 2023, and the kids returned home. To ensure that they reach the maximum point, they are diligently working toward their goals. They are now taking care of their assignments.

I met with students from class 8 who, by providing excellent examples and cooperating with one another, have transformed the attitudes of our elementary students. We were able to create goals for each person, and I want to see this accomplishment by the end of the year.

I made time to visit several of our kids at other schools with the social worker. We had a great time discussing the students' performances and trends with the school heads. I'm hoping that these students in Njambini boys and Magomano girls will produce outstanding outcomes.

CHARITY DEEDS

I give thanks to God for the DECA Foundation, who gave up their time to show our kids how much they mean by being born and found themselves in Tumaini. They were able to bring food stuffs and clothes. They also participated in making our environment green by planting trees. I have faith in God for new friends to spread his love to our children.

Their donation in kinds;

•Wheat flour = 4 bales

• Maize flour = 6 bales

• Rice = 4 bags

• Sugar= 25 kg

• Tissue 1/4 bale

• Clothes

• Pairs of Shoes

Sustainability Projects

EMAIL: TUMAINI@GOAWEB.ORG

We have been able to cultivate a variety of crops, including potatoes, maize, onions, cabbages, and animal feed since the rainy season started. Children are currently eating cabbages that are ready, and our land is now lush with greenery.

Home Activities

During Midterm break some of our high school children were able to visit with their family ,this is one way we are working with the government in helping them create a bond with their families and am glad that we never had any crash back on the same.

Other children that remained in the home learnt several life skill Activities which include doing general cleaning, cooking and farming.

NYANDARUA DAY OF THE AFRICAN CHILD

Our kids had the opportunity to take part in the Day of the African Child. They had time to present and really enjoyed themselves. More safety tips for navigating the digital world were imparted to them. Additionally, they learned how to properly defend oneself from harm or abuse.

I was also able to give a speech that touched more on such important days for the children and also the partnership between CCI`S and county government especially during this period of transition in changing the way we care.

DEVELOPMENTS

I thank God for providing funds that have enabled us do some mile stones in development. This epitome of success has been enabled through the combination effort of every stake holder. As per now High school boys' toilet are almost complete, new high school staffroom is complete, 10 new girls` beds and renovation of temporal JSS classes is ongoing. Am looking forward to these developments continuing until the last phase is over.

SUPPLICATION ITEMS

1. Incinerator: We continue to rely on God to create for us an incinerator so that we can get rid of our trash.

2. Backup generator—With this, our kids will be able to continue their studies into the evening and feel more secure when the power goes out.

3. Administration Block – We are excited to have a centralized administration where people can receive services and where there will be more opportunities to change lives by converting the offices that are currently used as sleeping quarters.

4. Rerouting of electricity poles: We are relying on God to supply the funds necessary to relocate electricity poles from our road to the proper location and support the upkeep and improvement of our road.

5. Tilling of high school section classes and boys Dormitory: Due to the poor condition of the floors in these areas, we are relying on God to provide the money needed to tile them.

6. Painting of classrooms and dorms: We are relying on God to supply the money we need to paint our classrooms and dorms and make them more appealing.

7. Kitchen cabinet installation and tiling in staff housing

8. By January 2024, all of our kids will have school shoes.

9. Using laptops to raise our school's technological standard

10. Whiteboards for our school

11. Drainage system that covers the front side

APPRECIATION

Our Bishop and all of the directors have consistently supported us, and we are appreciative of that. We kindly ask that you continue to provide our institution your best efforts.

Last but not least, we want to express our gratitude to all of our supporters and well-wishers.

Blessings.
